

# INTERDISCIPLINARY SEPSIS & COVID-19 SYMPOSIUM

A virtual (and complimentary) meeting on September 28-29, 2020

We invite you to join us for the 3rd biennial sepsis symposium hosted through the University of Illinois at Urbana-Champaign. Our goal is to bring together international experts and opinion leaders from many different disciplines to discuss sepsis, including big data/machine learning, endotyping, novel devices, government funding, sepsis outside the hospital, epidemiology, industry diagnostics, and clinical trials. Additionally, in response to the COVID-19 pandemic, this symposium will bring people together to discuss how cutting-edge research in sepsis could potentially help with the crisis both in and out of the hospital.

In addition to panels with significant audience interaction with the speakers through Q&A, the symposium will feature intimate 30-minute Networking Breakout Sessions with separate rooms for private discussions with individual speakers in small group settings. These are limited to 20 participants per room on a first-come first-served basis.

Registration is complimentary and required. The virtual webinar will be limited to 1,000 participants so register early! Continuing Education Credit may be available. Intimate Networking Breakout Sessions will fill up quickly, so early registration is recommended.
